

ons

Code example	
1	<code>from pyspark.sql import SparkSession</code>
Create a SparkSession or get an existing one:	
1	<code>spark = SparkSession.builder.appName("myApp").getOrCreate()</code>
Now you can use the spark object to work with Spark	

Basic syntax of cd command:	
1	<code>cd [options]... [directory]</code>
Example 1: Change directory location to folder1:	
1	<code>cd /usr/local/folder1</code>
Example 2: Get back to the previous working directory	
1	<code>cd -</code>
Example 3: Move up one level from the present working directory tree	
1	<code>cd ..</code>

Example (docker-compose.yml)	
1	<code>version: '3'</code>
2	<code>services:</code>
