

# Hands-on Lab: CREATE, ALTER, TRUNCATE, DROP

**Estimated time needed:** 20 minutes

In this lab, you will learn how to create tables and load data using the phpMyAdmin graphical user interface (GUI) tool in the MySQL database service.

## Software Used in this Lab

In this lab, you will use [MySQL](#). MySQL is a Relational Database Management System (RDBMS) designed to efficiently store, manipulate, and retrieve data.

To complete this lab, you will use MySQL relational database service available as part of IBM Skills Network Labs (SN Labs) Cloud IDE. SN Labs is a virtual lab environment used in this course.

## Objectives

After completing this lab, you will be able to use phpMyAdmin with MySQL to:

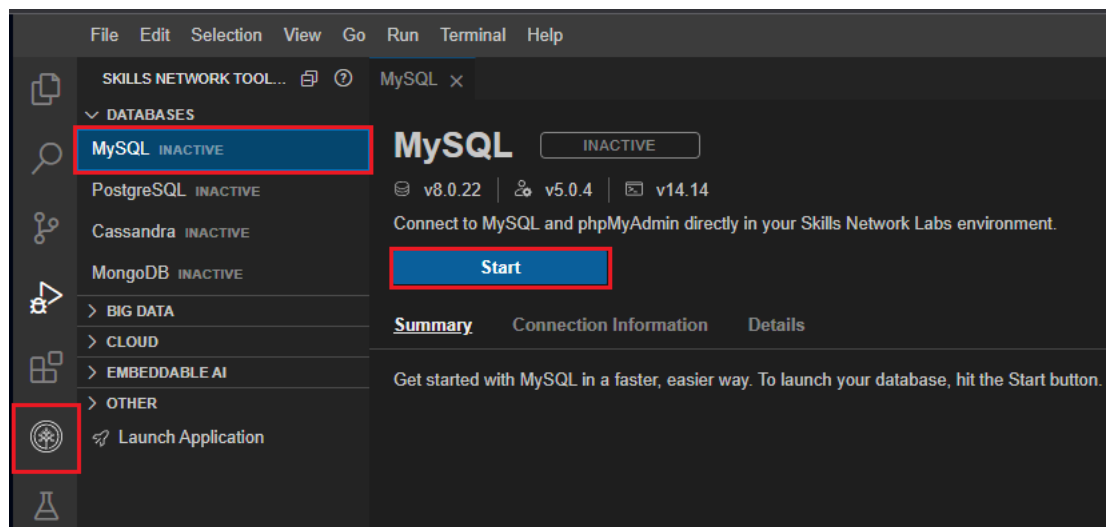

- Create a database.
- Create a new table in a database.
- Add, delete, or modify columns in an existing table.
- Remove all rows from an existing table without deleting the table itself.
- Delete an existing table in a database.

## Task 1: Create a database

Follow the steps below to create a new database in the phpMyAdmin GUI of MySQL.

1. Click on **Skills Network Toolbox**. In the **Database** section, click **MySQL**.

To start the MySQL, click **Start**.

2. Once **MySQL** has started, click the **phpMyAdmin** button to open **phpMyAdmin** in the same window.

The screenshot shows a web interface for MySQL and phpMyAdmin. At the top, there is a menu bar with options: File, Edit, Selection, View, Go, Run, Terminal, and Help. Below the menu, there are tabs for 'MySQL' and 'phpMyAdmin'. The 'MySQL' tab is active, indicated by a green 'ACTIVE' button. The interface displays the MySQL version (v8.0.22), phpMyAdmin version (v5.0.4), and the environment version (v14.14). A message states: 'Connect to MySQL and phpMyAdmin directly in your Skills Network Labs environment.' Below this message is a blue 'Stop' button. There are three tabs: 'Summary', 'Connection Information', and 'Details'. The 'Summary' tab is selected. It contains the text: 'Your database and phpMyAdmin server are now ready to use and available with the following login credentials. For more details on how to navigate MySQL, please check out the Details section.' Below this, there are fields for 'Username:' (malikas) and 'Password:' (masked). There are also buttons for 'phpMyAdmin' and 'MySQL CLI'. At the bottom, there are buttons for 'MySQL CLI' and 'New Terminal'.

## Task 2a : CREATE statement

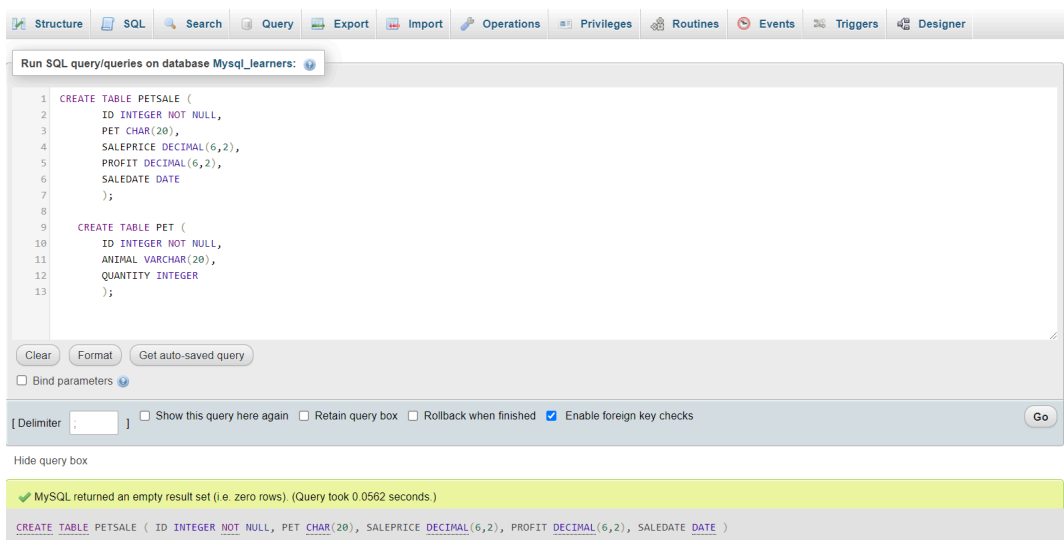

Now, you will use the CREATE statement to create two new tables.  
Follow the instructions to complete this task.

1. You need to create two tables, PETSale and PET. To create the two tables, copy the code below and paste it into the text area of the SQL tab. Click Go.

```

### 3. Modify a column

Change the data type to VARCHAR(20) type of the column PET of the table PETSALE and show the altered table. Copy the code below and paste it into the text area of the SQL page. Click Go.

1. 1  
2. 2  
3. 3

```

1. ALTER TABLE PETSALE
2. MODIFY PET VARCHAR(20);
3. SELECT * FROM PETSALE;

```

Copied!

You can click on the table name PETSALE in the tree structure on the left and then click on the Structure tab in the interface. You can then see the table structure shows the modified column data type, as shown in the image below.

Run SQL query/queries on table Mysql\_learners.PETSALE:

```

1
2 ALTER TABLE PETSALE CHANGE `PET` `PET` VARCHAR(20);
3

## Task 4: TRUNCATE statement

In this exercise, you will use the TRUNCATE statement to remove all rows from an existing table without deleting it.

Let's remove all rows from the PET table and show the empty table. Copy the code below and paste it into the text area of the SQL page. Click Go.

- 1
- 2
- 3

1. TRUNCATE TABLE PET ;
- 2.
3. SELECT \* FROM PET;

Copied!

The screenshot shows a database management interface with a menu bar containing: Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, and Operations. Below the menu bar is a toolbar with icons for each function. A dropdown menu is open under the 'SQL' tab, showing the option 'Run SQL query/queries on table Mysql\_learners.PETSALE:'. The main text area contains the following SQL code:

```
1 TRUNCATE TABLE PET ;
2 SELECT * FROM PET;
```

## Task 5: DROP statement

Finally, you will use the DROP statement to delete an existing table. Let's delete the PET table and verify if the table still exists or not (the SELECT statement should give an error if a table doesn't exist). Copy the code below and paste it into the text area of the SQL page. Click Go.

1. 1
  2. 2
  3. 3
1. DROP TABLE PET;
  - 2.
  3. SELECT \* FROM PET;

Copied!

The screenshot shows the same database management interface as above. The dropdown menu under the 'SQL' tab is still open. The main text area now contains the following SQL code:

```
1 DROP TABLE PET;
2 SELECT * FROM PET;
```

## Practice problems

Try the following problems for an enhanced practice of the concepts learned in this lab.

1. Create a new table in the database named Toys with attributes as ID (integer), Variety (variable length string), and Quantity (integer). Make sure the ID is not Null.

► [Click here for the solution](#)

2. Add the below-mentioned entries to the table using the INSERT statement.

**ID    Variety    Quantity**

- 1 Chew toy    20
- 2 Balls       50
- 3 Bowls       30
- 4 Foldable bed 40

► [Click here for the solution](#)

3. ALTER the length of 'Variety' in the table to 30 characters.

► [Click here for the solution](#)

4. TRUNCATE the table 'Toys'

► [Click here for the solution](#)

5. DROP the table 'Toys'

► [Click here for the solution](#)

## Conclusion

Congratulations on successfully completing this lab.

By now, you have learned how to:

- Create a database in phpMyAdmin GUI on MySQL.
- Use the CREATE statement to create new tables in the database.
- Use the INSERT statement to add records to the tables.
- Use the ALTER statement to add, delete, rename, or modify the columns of an existing table.
- Use the TRUNCATE statement to delete the contents of an existing table (but not the table).
- Use the DROP statement to delete an entire table.
